## OUR NEW CLOUD BASED SOFTWARE FROM MICROSOFT DYNAMICS 365

Allowing remote access  
to our office from  
anywhere in the world

Earlier this year Fleming moved our office over to remote cloud based software.

Microsoft Dynamics 365 is a platform that combines Accounting, CRM and Operations enabling us to work from anywhere with fluent integration in all areas of our business.

We were so lucky to have implemented this prior to COVID-19 so that our staff are able to continue working from home during lock down in March.

We hope to expand into the service platform in the coming months and build an entirely cloud based system.
